Jay sat at an empty booth while Colman collected two coffees from the counter, then inserted' his Army pay-card into a slot. In a lot of ways lay reminded Colman of himself when he was a lot younger. Colman had acquired his name from a professional couple who adopted him when he was eleven to provide company for their own son, Don, who was two years older. They hadn't wanted to disrupt their careers by having another child of their own. Colman's stepfather was a

thermodynamics engineer involved with heat exchangers in magnetohydrodynamics systems, which accounted for Colman's early interest in technology. Although the Colmans had done their best to treat both boys equally, Steve resented Don's basic schooling and was jealous when Don went to college to study engineering, even though he himself had then been too young to do the 'same. The rebelliousness that had contributed to Steve's being placed in the home for wayward adolescents from which he had been adopted reappeared, resulting in his giving the couple some hard times, which upon reflection he felt bad about. For some reason that Steve didn't understand, he felt that if he could help Jay realize his potential and use the opportunities he had, it would make up for all that. Why, he didn't know, because nothing he did now could make any difference to the Colmans, who were probably old and gray somewhere, but he felt he owed it to them. People's minds worked like that. It was just as well that he had; the scheme that Sirocco finally evolved required some familiarity with the Mayflower II's electrical systems, and while Colman had been prepared to have a crack at that part of it, Bernard was the obvious one. she knew Luki for what he was even before he popped out of her. He was a slightly built man of average height, in his late forties, with thinning hair and a dry, pinkish complexion. "We all did. And it doesn't change when you get older. It gets worse. With two types of component or anticomponent to choose from for each triplet, a triplet could comprise either three of a kind of one type, or two of one kind plus one of the other. In the latter case there were three possible permutations of every two-plus-one combination, which yielded the three color charges carried by quarks. The three-of-a-kind combinations could be arranged in only one way and corresponded to leptons, which was why leptons could not carry a color charge and did not react to the strong nuclear force.. Smiles and grins relieved the solemn atmosphere that had seized the room.. From the direction of the table, Jean emitted an audible sigh of relief. Bernard grinned up at the screen. "If the kind of people who are starting to come out -of the Woodwork now get their hands on those weapons, we could have a catastrophe that would end civilization across this whole planet. You've all seen what's happening back on Earth. Well, the same mentalities are here too, and they're panicking. We must keep enough of the Army together to stop anything like that if we have to." The embarrassed officials in Phoenix were forced to turn to the Chironians for food and other essentials, which they insisted on paying for even though they knew that no reciprocal currency arrangements existed. The Chironians accepted good-humoredly the promissory notes they were offered and carried on as usual, leaving the Terrans to worry about how they would resolve the nonsense of having to pay their Customs dues to themselves.
